PROFESSIONAL SUMMARY

Fullstack Web and Mobile Developer with over 6 years of experience. Skilled in React Native, TypeScript, and backend development with Node.js and Laravel. I have contributed to large-scale projects in the financial sector such as Conti Móvil, Continental Banca Empresas, and Billetera Mango, three of the most widely used apps in Paraguay. I have also successfully led development teams and projects, including the Farmacia Canaria telemedicine platform and the PadelSys mobile app. I am passionate about clean code, scalability, and guiding teams to deliver impactful solutions.

Skills

- **Mobile & Web Development:** React Native, Flutter, TypeScript, JavaScript, HTML, CSS, Bootstrap, jQuery, Swift, Swift UIKit, SwiftUI
 - **Back-End:** Node.js, Express.js, PHP, Laravel
 - **Databases:** MySQL, Microsoft SQL Server, MongoDB
 - **Tools & Frameworks:** Redux, Docker, Git, GitHub, GitLab, Next.js, MaterialUI, Rive
 - **Cloud & Hosting:** Firebase
 - **Other Skills:** Scrum, Agile Methodologies, API Development, App Performance Optimization
-

Work experience

React Native Developer Sr

Billetera Mango, Asunción

July 2024 – Present

Develop and maintain new features for Billetera Mango, a wallet app with over 1 million users.

- Collaborate with a Scrum team to deliver high-quality user experiences.
- Focus on app performance, code quality, and feature scalability.

Skills: React Native, TypeScript, Firebase, Redux, Animated, Rive

React Native Developer

Banco Continental SAECA, Asunción

June 2022 – July 2024

- Worked on **Conti Móvil**, a home banking application with over 450,000 users.
- Contributed to the continuous improvement of **Continental Banca Empresas**, the bank's app for enterprise clients.
- Developed new features and resolved front-end issues to ensure a seamless experience.
- Contributed to the app's continuous improvement under a Scrum methodology.

Skills: React Native, TypeScript, Firebase, Redux, Animated, Scrum

Full Stack Developer

Arco SA, Asunción

February 2022 – June 2022

- Managed and enhanced the core web system of the radiology clinic.
- Developed modules for patient management, billing, and role-based access control.

Skills: Laravel, Vue.js, Express.js, HTML5, MySQL, PHP

System Support & Developer

Cambios Chaco, Asunción

June 2021 – February 2022

- Provided technical support for internal systems.
- Contributed minor development improvements to internal tools

Skills: PHP, MySQL, System Support

- Started career as **Junior Developer** in a platform for marathon and running event registration and management.
- Contributed to developing and maintaining modules for event organization, participant management, and reporting.
- Supported debugging and client requests while gaining hands-on experience with modern web technologies.

Skills: PHP, HTML, CSS, MySQL

FREELANCE PROJECTS

- **PadelSys App (2024 – Present)**

- **Sole frontend developer and technical owner** of the **PadelSys mobile app**, built in React Native to manage tournaments and track player statistics.
- Took responsibility for the **entire mobile frontend lifecycle**, from planning and architecture to coding, testing, and delivery.
- Met regularly with the **stakeholder** to understand business needs and translated them into functional modules of the app.
- Acted as the **bridge with backend developers**, specifying the APIs required, their purpose, and ensuring they met the needs of the mobile client.
- Ensured a **scalable, maintainable, and user-friendly app** by taking charge of architectural decisions, code quality, and performance optimization.
- Delivered a professional-level app experience comparable to top sports management platforms, fully aligned with stakeholder requirements.

Skills: React Native, TypeScript, Redux, Animated, Firebase, Product Ownership, deeplinking

- **Realtec (2025 - Presente)**

- Developed a landing page in Next.js for the construction company Realtec. The project is completed but not yet deployed. You can find the page at <http://www.studiom.com.py/>

Skills: [Next.js](#), Tailwind CSS, git, Product Ownership

- **PadelSys Push notification service (2025)**

- Due to a limitation in the PadelSys backend, it couldn't integrate Firebase's push notification service. To solve this, I developed a separate backend with authentication that exposes an endpoint to send push notifications to specific users when called

Skills: Expressjs, TypeScript, Firebase, Product Ownership,

- **Farmacia Canaria (2023 – 2024)**

- **Project Lead** for a **telemedicine platform** developed for a Spanish client via Upwork.
- Directed a distributed team of 3 Argentinian developers while serving as the **sole backend developer**.
- Built features such as medicine reminders, role-based user management (patients, relatives, nurses), patient-family-nurse relations, and medication statistics.
- Designed backend using **Node.js, Express, Sequelize ORM, Node CRON, MySQL** and integrated **Firebase Cloud Messaging**.

Skills: React Native, TypeScript, Redux, Animated, Express.js, Sequelize ORM, Node.js, Firebase Cloud Messaging, MySQL

- **Arco Ubis (2022)**

- Led the development of an internal app for location selection using maps
Skills: React Native, TypeScript, Context API, Animated
- Held regular meetings with the **stakeholder** to gather requirements and transform them into functional modules for the app.
- Took full ownership of frontend mobile architecture, performance optimization, and code quality, ensuring scalability for future use cases.

Skills: React Native, TypeScript, Context API, Animated, Product Ownership

- **App Gastro:** Built features for a restaurant app for placing orders, payments, and managing reports.

Skills: React Native, TypeScript, Docker, Animated
